Project Design Phase
Solution Architecture

Date	08/04/2026
Team ID	SWTID-2026-3627
Project Name	SmartLibrary Request Workflow In ServiceNow
Maximum Marks	4 Marks

Solution Architecture:

The Smart Library Request Workflow is designed to automate and streamline the process of requesting, approving, and issuing library resources (books, journals, digital content) using ServiceNow.It replaces manual processes with a centralized, transparent, and efficient digital workflow.:

Find the best solution:

Use ServiceNow to automate library requests and solve manual process issues.

Explain the system:

Show how the system works, its structure, and how it handles requests.

Define features and phases:

List features (request, approval, tracking) and steps to build the system.

Provide specifications:

Set clear rules and guidelines to develop, manage, and deliver the solution.
